## Who we are?

Global Security Systems W.L.L is the market leader for total safety and security solutions integration in Kuwait as well as other Middle East countries. Our parent company is established in 1972, the relentless endeavors in catering the market with leading edge security solutions have created strong demand for our solutions and long term relationships with our valuable clients. We believe in providing cost effective solutions to our customers while ensuring high quality of service and products that we provide. With our technically innovative solutions and genuine integration we maintain a unique reputation in the market.

We have world renowned manufactures to supply us with leading edge technology and systems. We are registered with highly reputed clients in their qualified list of contractors for their regular tendering purpose, the list of our clients include Ministries, Oil sectors, Business Malls, Hospitals, Banks and many other major establishments in public as well as private sectors.

## What we do?

We explore, define, design and implement the advanced leading edge security solutions in Kuwait and the Middle East market. We serve many vertical clients, in each area our expertise in advanced technology solutions helps the customers benefit from the best technology solutions available in the industry.

To ensure efficiency and maintainability we offer our engineering experience, proven standards and project methodology. We offer a wide range of advanced technology solutions such as - IP/HD Analog CCTV, Access Control, Time & Attendance, Intruder & Environmental Alarm systems, Parking Management System, LPRS, Q-Management System, Public Address System, EAS System, PABX System, SMATV System, Audio/Video Intercom, Nurse Calling System, Structural Cabling and various Safety & Security Products.

## What we are specialized in?

- Planning, Survey & Designing
- Project Costing & Supervision
- Implementation and Provide Solutions
- Integration, Installation & Maintenance
- System integration for IP networks and Security Systems
- Testing, commissioning, and training
- Leading edge technologies and solutions

## How do we work?

We have a great team of people who believe in and live by our vision; our unique work culture fosters excellence and innovation. The things we hold highest interest are “commitment, accountability and dedication”.

Effective project management is the key to our record of success in project implementation. Each job is assigned to a lead Project Engineer who provides:

- A single point of client contact
- Milestone tracking and schedule maintenance
- Periodic status reporting
- Meeting documentation
- Hours and expense monitoring
- Resource co-ordination
- Project invoicing

Quality and excellence are given an extreme priority at each stage of our work; we follow our refined methodology to make sure our customers imaginations are turned in to reality with 100% accuracy.

## Survey & Assessment:

At the survey stage our professionals evaluate the customer needs in detail and define the goals that are to be achieved from the implementation.

## Design:

Based on our extensive knowledge of multiple security solution we define a comprehensive design which suffices our customer needs.

## Scope Definition:

At this stage we define a phase by phase project deliverables detailing the technical components, schedules and requirements etc.

## Approval:

We make sure customer approve the final scope document prior to the implementation stage.

## Implementation:

Once the scope document is finalized and the contract is signed we initiate the implementation stage. Our project managers will take the end to end responsibility of the projects to meet the deadline and the quality aspects.

## Testing:

At this stage we make sure that the project meets all technical specifications and features in line with the customer requirement.

## Handover and Training:

Once the installation work is completed in all respects, the final process of commissioning of the project will be done by the GSS Engineers in presence of the client's representative.

There after the systems will be properly handed over by Global Security Systems W.L.L to the client by mutually signing a "Handover Certificate" for record.

## On-going support:

We extend our ongoing support by phone, E-mails and onsite visits when necessary. To ensure a highly efficient operation and customer satisfaction we possess;

- Experienced call centre professionals deliver 24/7, 365-days response
- On-site service with emergency call escalation
- Preventive maintenance, internal repair
- Software support, product training & support
- Expert servicing of all major manufacturers of financial & security equipment
- Responsive service with 15 experienced technicians

Continued maintenance for a security system becomes very important as this will maximize the investment and enable your system to provide the best possible efficiency. We are fully equipped to maintain and repair the systems despite age and condition. After each maintenance visit a full report would be compiled indicating all the checks and repairs carried out on the system. All chargeable items would be agreed prior to any work being carried out to avoid any hidden cost.

## Some of the maintenance service that we can provide:

- Pay as you go system maintenance
- Service any system despite the age and condition
- Comprehensive parts and labour package
- Comprehensive labour only package

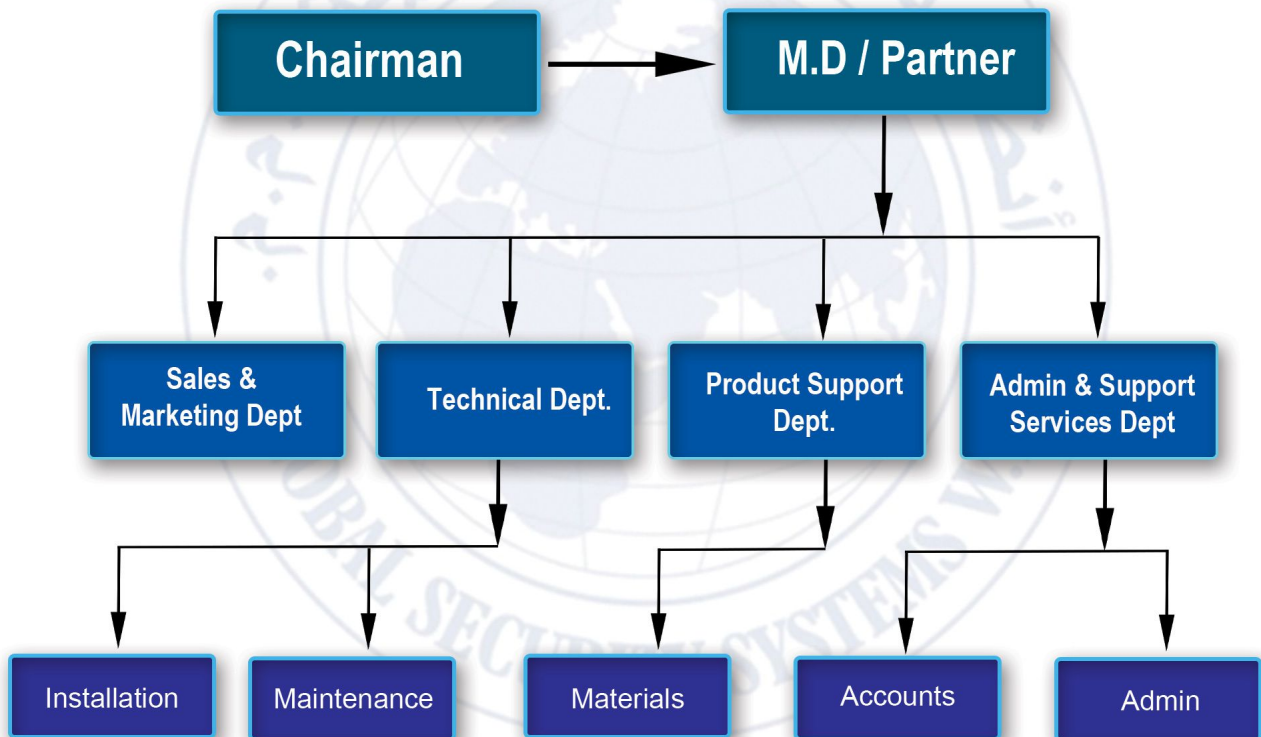

## Our Mission:

To provide customized electronic security solutions and products while consistently exceeding consumer expectations through well defined processes undertaken by a team of committed professionals.

Yours sincerely,

P. C. Chee  
Director

For VISCON SYSTEMS SDN. BHD.  
Manufacturer of Electronic Queue System (EQS)  
and visual communication products.

# Our Latest Project Achievements

We are proud to announce our project with Kuwait MOI, for supplying and installation of High Security Road Blocker for maximum security of the premises. In addition to that, early this year they awarded to Global Security Systems to pursue the additional security protection with Bollard System.

We have been awarded another Ministry of Foreign Affairs project for supply and installation of Queue Management System and Annual Preventive Maintenance contract for Shuwaikh Consulate Branch, Liberation Tower Branch and Airport Branch. Since 2015 till date we've been supplying and maintaining their existing systems. We are proud to be at the service of this prestigious Government Institution.

We are honored by Kuwait Ministry of Electricity and Water for Supply and Installation of IP CCTV Surveillance System at Al Doha West Power Station. This project is yet another recognition of our expertise in the field of modern security surveillance solutions.
